Pragmatic Works

TOP 5 REASONS TO JOIN THE PRAGMATIC WORKS' CLIENT SOLUTIONS TEAM:

1. WORK WITH IMPRESSIVE CLIENTS

96% of Fortune 100 companies are Pragmatic Works clients and you'll have the opportunity to work directly with the biggest names in business.

2. GAIN ACCESS TO THE MICROSOFT ROADMAP

As a Microsoft Gold Certified Partner, our relationships with Microsoft's engineering and strategy teams run deep. We help shape the Microsoft Product Roadmap and see the latest features before anyone else.

3. CREATE YOUR OWN FLEXIBLE WORK/LIFE BALANCE

Unlike other consulting firms, we limit travel to no more than 50%, and you're in control of scheduling your time on-site with the clients.

4. ACCELERATE YOUR TRAINING AND DEVELOPMENT

Our in-house mentorship program gives you the ability to grow your technical and professional skills.

5. MAKE AN IMPACT

As we've grown, we haven't lost our start-up mentality. At Pragmatic Works, all of our employees have a voice to influence change. Whether it's within our own company or for our clients, you have the opportunity to make an impact.

Senior BI Consultant Position

Experience: 5+ Years

Skills: Azure, Power BI, SSIS, SSRS, SSAS, T-SQL

We are seeking senior business intelligence consultants who can implement end-to-end business intelligence solutions and manage BI projects for clients in different industries dealing with various types of challenging data.

CANDIDATE QUALIFICATIONS

- Should be driven to help clients gain a competitive advantage by implementing information management and analytical solutions which provide them with business insights optimizing their operational performance.
- Must have an advanced knowledge of SQL Server, SSIS, SSAS, SSRS, Power BI, and some experience with programming languages. Knowledge of Azure Machine Learning, R programming, Analytics, Big Data, Hadoop, Spark, Data Lake, and SharePoint is also a plus.
- Must have strong communication skills that allow them to regularly deal with clients and their staff, as well as with specialists from related fields, including architects, administrators, engineers and business specialists.
- Must have outstanding analytical and problem solving skills and a good grasp of both the technical and business side of business intelligence and always keep up to date with the latest BI tools and technologies.
- Must have a strong desire for continual learning and development and be willing to demonstrate examples of that in their career.

A SUCCESSFUL CANDIDATE WILL POSSESS THE FOLLOWING SKILLS AND CAPABILITIES

- Experience in creating Power BI and SSRS reports based on business questions with linked content, drilldowns, and nested parameters, Tableau experience is a plus
- Experience in working in Azure including Azure Machine Learning
- Experience programming in R
- Writes advanced SQL including some query tuning
- Experience in the identification and resolution of data quality issues
- Ability to design databases for OLTP and Data Warehousing needs
- Provides project management and leadership as appropriate to drive timelines and deliverables
- Trains others on skills and competencies required
- Experience designing and building complete ETL/SSIS processes moving and transforming data for ODS, Staging, and Data Warehousing
- Responsible for modeling and creating database(s) to support business intelligence and business process automation project initiatives
- Some Knowledge of C# required
- Design, develop and implement web-based/SharePoint user interfaces to ensure ease of use and minimal knowledge by the functional work group that will be using the database
- Utilize ad-hoc techniques to perform on-the-fly analysis of data
- Ability to create measures or KPI (Key Performance Indicators)
