Pragmatic Works is Presented with Big Data Award by HPE and Microsoft at Worldwide Partner Conference

Pragmatic Works has been named an Outstanding Frontline Partner in Big Data by HPE and Microsoft for the fifth year in a row. Pragmatic Works is a Microsoft NSP Partner with Gold Competencies in Data Platform, Cloud Platform and Data Analytics, and a Silver Competency in Application Development.

The worldwide HPE/Microsoft Frontline Partnership (FLP) is a 30-year-old alliance that works to ensure that Microsoft and HP products have been designed and engineered to work together and are supported by both companies. Together with Pragmatic Works, they take platforms customers are familiar with and build integrated data solutions, services and support that amplify the speed and effectiveness of businesses and deliver real results.

“It has always been a goal at Pragmatic Works to enable clients to accelerate growth through a highly functioning data-driven enterprise,” states Adam Jorgensen, President of Consulting for Pragmatic Works. “We are honored to work with HPE and Microsoft in order to assist companies in reaching this goal and excited to be recognized for our work in this partnership once again.”

Pragmatic Works was recognized for this award for their work at UnitedHealth Group. UnitedHealth Group worked with Pragmatic Works to develop an APS solution that gave them the ability to process large data volumes while minimizing coding and performance efforts. Through Pragmatic Works efforts, UnitedHealth group successfully migrated to the cloud and significantly reduced their processing time.

About Pragmatic Works
