

# Power Apps Canvas Key Functions for Beginners

When creating a canvas app in Power Apps, there are some simple ways to enhance it. This cheat sheet will show you the basic formulas you can use to make changes to control properties. These formulas include changing the format, position, simple calculations, and implementing conditional formatting.

## Common Expressions to Know First

**Note:** This training includes a mixture of lecture and hands-on labs. Attendees should be prepared to follow along and build apps with the instructor with their own Power Apps account.
