

### Top Benefits:

AUTOMATION

IMPROVED  
MANAGEABILITY

TIME SAVINGS

COST REDUCTION

### Are You Wasting Time On Your Current Environment?

Companies are pushing to do more with their data by taking advantage of the latest cloud-based Business Intelligence solutions, while lessening the costs of running their legacy Business Intelligence environments. They are tired of scaling appliance architectures and need new platforms for Big Data, scale out processing, data lakes and analytics.

With these challenges and more facing the data efforts of today's business, it is even more important that they leverage the benefits of a cloud BI/DW solution.

Our Cloud BI & DW Accelerator helps customers cut through the confusion in the cloud data space by moving their existing BI environment to a new, high performing, cost effective Azure solution in a matter of weeks. Key benefits to a BI/DW environment in Azure include:

- Rapid development of new data solutions
- Keeps your data next to the rapidly innovating cloud services
- Provides expandable capacity and manageable costs
- Speeds time to delivery
- Automated maintenance and management
- Improved automation

### 6-Week Agenda:

- **Phase 1 – Assess existing BI/DW environment**
  - Data and update project
  - Migration roadmap
- **Phase 2 – Build out new BI/DW Environment**
  - New Azure environment to support BI/DW and data management
  - ETL Modernization to work with your new DW and BI Environment in Azure
- **Phase 3 – Migrate existing environment to new Azure platform**
  - Automation scripts and best practices mentoring
- **Phase 4 – Test and document new Azure BI environment**
  - New architecture diagrams and basic environment documentation
  - Future BI/DW roadmap for managing your cloud DW/BI environment
