

Power BI Pack

ON-DEMAND TRAINING

Course Overview

Our Power BI Pack includes our 6 Power BI courses plus a bonus free course that is exclusive to Elite and Power BI Pack holders. This group of courses will turn you into a Power BI expert by providing in-depth instruction on all of the capabilities that Power BI provides. Learn how to utilize Power BI to transform your data into easy-to-use visualized reports and dashboards that you can share and view from any device.

The Power BI Pack Includes:

Power BI Desktop and Dashboards

This class exclusively uses the Power BI Desktop application to create solutions that are deployed to the Power BI Service and are then visible from any device.

Power BI with Excel

The Power BI with Excel course is designed to get you up-to-speed using tools easily accessible to power users and all Microsoft Office users including Office 365.

Power Query for Business

The Power Query for Business course is designed to help you understand how Power Query can be used for self-service data extraction and manipulation.

Introduction to DAX

The Introduction to DAX course is designed to teach the fundamentals of DAX while emphasizing the basic building blocks required to author more complex DAX calculations.

Advanced DAX

This course focuses on the advanced and difficult to comprehend DAX concepts like evaluation context, security, iterator functions, and advanced DAX functions.

Power BI for Consumers

This course is designed to get you up to speed on consuming data and interacting with reports in Power BI.

Power BI Administration

This course provides the framework necessary to successfully integrate Power BI into your corporate environment.

Bonus Course - Power BI Custom Visuals

This video series will teach you how to use each of the Power BI Custom Visuals that are available in the Power BI Custom Visual Gallery.
