

# Power BI for Consumers

ON-DEMAND TRAINING

## Course Overview

This course is designed to get you up to speed on consuming data and interacting with reports in Power BI. This is key to help you understand where your business has been and where it's going in the future. First, you will learn how to get connected to the Power BI Service. Once connected, you will see how easy it is to interact with reports and even change their appearance to better suit your needs. Lastly, you will learn how to build your own dashboards from these reports and see how they can be immediately viewed from your mobile devices.

### Goals for this course include:

- Understand how to consume data and interact with reports in Power BI
- Understand how to navigate the Power BI Service
- Learn how to use the Power BI Mobile app to view your dashboards

### Course Outline

- Class Introduction
- Power BI Service Basics
- Interacting with Datasets
